Programming Languages: C, C++, Java, Servlet, JSP

Web Technologies: HTML, CSS, Basic of JavaScript, Bootstrap.

Database Management: MySQL

Soft Skill: Time Management, Project Management, IT Support, Innovative, Dynamic.

FREELANCING

Web Developer 09/2023 – 08/2024
hello! DEWAS® 🌐

As a Web Designer & Developer, I created responsive and visually appealing websites using HTML, CSS, JavaScript, and Bootstrap, ensuring cross-browser compatibility and mobile responsiveness. Myself and I collaborated with back-end developers to integrate APIs and dynamic content, focusing on enhancing user experience and stick to modern design trends.

PROJECTS

Keshav Industries – E-Commerce Website 🌐

Front-End Developer

Built a responsive e-commerce site using React, with HTML, CSS. I played role as frontend web developer.

Pratik Steels 🌐

Web Developer

Buids a clean, responsive site using HTML, CSS, and Bootstrap. It features sections for company info, products, services, and contact details, with smooth navigation and a professional layout tailored for showcasing steel products.

Online OTP Attendance System

Full Stack Developer

Developed an Online OTP Attendance System with a front-end using HTML, CSS, and Bootstrap and a back-end powered by Java Servlets, JSP, and MySQL. Implemented OTP-based authentication to enhance security, while using MySQL database schemas for efficient data storage.
